

## How to Install Your GeauxPass?

Read these directions first or call the GeauxPass Customer Service Center for help. Once the tag is installed on the inside of your windshield, it cannot be removed without damaging the electronic chip inside.

**Clean.** Clean and dry the inside of your windshield. Your windshield temperature must be above 50° F for the GeauxPass to stick.

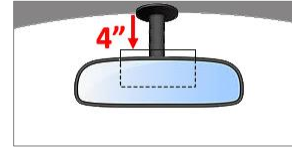

**Position.** Your GeauxPass goes on the inside of your windshield behind the rearview mirror. See illustrations on the right. Your GeauxPass will not work if you place it too close to metal or metallic tinting.

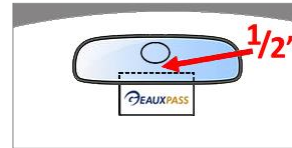

**Stick.** Peel off the clear backing and stick to the inside of the windshield. The barcode will be facing you. Start in the center and smooth the GeauxPass against the glass in a circular motion to get a tight seal.

## Where Your GeauxPass Goes?

**Mirror attached to ceiling.** Center GeauxPass on windshield behind rearview mirror four inches below top edge of windshield.

**Mirror attached to windshield.** Center GeauxPass on windshield a half inch below where the mirror attaches to the windshield.

**Oversized Trucks, Cargo Trucks, and Trucks with Flat Windshields.** Center GeauxPass on windshield two inches from the bottom of windshield.

In trucks, metal near the center of the windshield can interfere with the tag's performance. If a split windshield, place the tag 2 inches to the left of the split. If you have a tag from another state place the GeauxPass tag ½ inch below the other tag. Visit [GeauxPass.com](http://GeauxPass.com) for more information.
